

EXPLORING FAITH AND FUN IN DISCOVERY ZONE! ✨🧸

In our Discovery Zone, preschool students dive into hands-on play with toys, games, and their friends—learning important lessons while having fun! Using the **G.R.O.W.T.H. model**, children engage in **Guided Experiences** as teachers introduce activities that spark creativity, cooperation, and problem-solving.

While building towers, playing with blocks, or exploring pretend play, students practice **Reflection** and **Observation & Open Questions**, thinking about what they notice, asking questions, and discovering new ideas together. This encourages curiosity and helps children connect everyday experiences with God's truth.

Collaboration is key as students **Work & Wonder Together**, sharing toys, helping friends, and experimenting with different ways to play. They also **Tell & Show Understanding**, explaining their ideas, demonstrating new skills, or showing kindness in their actions.

Finally, each child participates in a **Heart Check**, reflecting on how they treated their friends, solved problems, and practiced patience or generosity. Discovery Zone helps students grow in creativity, friendship, and faith—making every playful moment a meaningful learning experience!
