

ART CLASS SPOTLIGHT

Fall-Inspired Pumpkin Creations

This fall, our lower elementary students embarked on a captivating art project, creating beautiful pumpkin scenes inspired by the season's rich colors and textures. Using a combination of oil and chalk pastels, the students explored how to create vibrant, multi-dimensional artwork by blending colors and textures. They learned about key art elements like color, texture, and line, which allowed their pumpkin designs to pop with depth and life.

The students applied oil pastels for vibrant, bold colors and chalk pastels to create soft, blended backgrounds, learning how different mediums can add unique qualities to their work. The contrast between the two types of pastels gave each piece a distinctive look, capturing the warm essence of fall with their own creative touches.

As their teacher, I was truly impressed by the dedication and skill each student demonstrated. Their artwork not only reflects their growing artistic abilities but also their enthusiasm and commitment to their craft. The final pieces are truly a sight to behold, showcasing a blend of creativity, technique, and the joy of the autumn season.
