

TRANSITIONAL KINDERGARTEN'S FARM ADVENTURE: EXPLORING UNDERWOOD FAMILY FARMS!

Transitional Kindergarten recently embarked on an exciting journey to Underwood Family Farms, and what an adventure it was! With hands-on learning at its core, our young explorers dove into the world of agriculture, discovering the magic of farm life firsthand.

Amidst rows of vibrant strawberries and a kaleidoscope of fresh vegetables, our students experienced the joy of harvesting their own food. From plump, juicy strawberries to crisp celery, colorful kale, and romaine lettuce, each pick was a lesson in the beauty and bounty of nature. But the fun didn't stop there! A thrilling tractor ride offered panoramic views of the farm, adding an extra dash of excitement to the day.

And let's not forget our furry and feathered friends! Meeting and feeding the farm animals was a highlight for our TKers, who learned about the importance of animal care and the interconnectedness of life on the farm.

Beyond the excitement and laughter, this field trip provided a valuable opportunity for our students to connect with nature and gain a deeper understanding of where our food comes from. By immersing themselves in the rhythms of farm life, they not only learned about local agriculture but also developed a newfound appreciation for the hard work and dedication of farmers.

As they returned to school with baskets brimming with fresh produce and hearts full of memories, our Transitional Kindergarten students reflected on a day filled with discovery, laughter, and learning. It was an adventure they'll treasure for years to come.
